Seller - Tax Responsibilities

- Colorado retailers/vendors must charge, collect and remit sales tax for the jurisdictions they share with their customer (also referred to as “shared tax”).
- Out-of-State retailers/vendors are required to charge, collect and remit sales tax if they are “doing business” or have “nexus” within the state or city.
- Some retailers/vendors “voluntarily” charge, collect and remit sales tax. (This is a courtesy to you!)

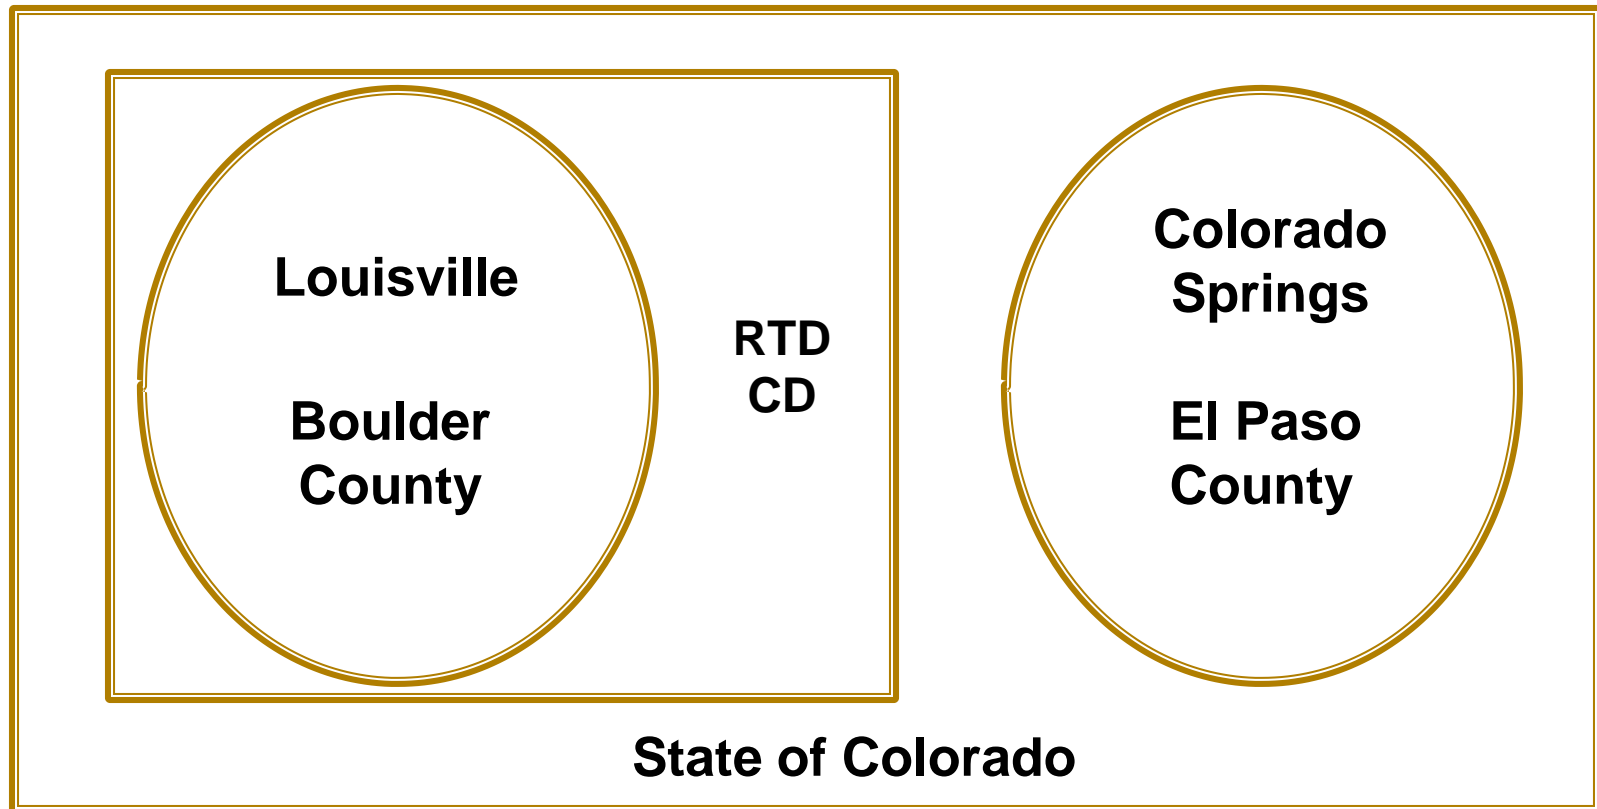

How Items are Taxed

- Items are taxed based on the location of the retailer/vendor when you pay for, and take items with you.
- Because you are standing in the store and taking the items with you, you share all jurisdictions, and the tax rate of the retailer/vendor is charged.
- Items are taxed based on the purchaser's location when items are shipped or delivered to you.
- The retailer/vendor should charge tax based on the jurisdictions they “share” with you (at a minimum).
- If the retailer/vendor is voluntarily collecting and remitting tax, they will charge the full tax rate for your location.

Shared Tax Collection

Shared Tax Collection

Taxing Examples - Delivery

- In-State purchase of a \$2,000 copier for delivery to Louisville:
 - **Denver** vendor should charge 4% or \$80 (2.9% state, 1.1% RTD/CD)
 - **Superior** vendor should charge 4.8% or \$96 (2.9% state, 1.1% RTD/CD, 0.80% Boulder County)
 - **Fort Collins** vendor should charge 2.9% or \$58 (2.9% state)
- Out-of-State purchase of a \$2,000 copier, On-line, by Catalog or Phone for delivery to Louisville:
 - No tax (no nexus)
 - 2.9% or \$58 (nexus in State)
 - 4% or \$80 (nexus in State & RTD/CD)
 - 8.3% or \$166 (nexus in Louisville or voluntary collector of sales tax)

What is Use Tax

- ▶ Use tax in the State of Colorado is based on the location of the “use” of the item.
- ▶ Use tax is a complement to sales tax, not an additional tax.
- ▶ When a vendor has not charged sales tax, the purchaser must pay use tax.
- ▶ Most companies currently remit State and RTD use tax to the Colorado Department of Revenue on purchases for which tax was not charged.
- ▶ Use tax was adopted by the State of Colorado to help ensure that a city or town having limited retail establishments would be able to generate revenues by taxing the “use” of goods being used in their community, in addition to the “sale” of goods.
- ▶ Use tax does not apply to inventory held for re-sale.
- ▶ Use tax due the City is reduced by the amount of sales or use tax legally paid to another jurisdiction up to the City’s tax rate.

To determine what tax rate was charged, divide the tax by the subtotal.

$$(1005.70 / 50,285.00 = .02)$$

Only Town of Firestone tax was collected at the rate of 2%.

Manufacturing equipment is exempt from State tax.

Firestone is not in the RTD District so no special district taxes are collected.

The difference between City of Louisville use tax of 3.5% and the 2% tax rate paid would be due to Louisville on the subtotal.

Samples, Demonstrations & Displays

For a sample, display or demo unit to be exempt and subject to resale, the retailer or wholesaler cannot make any use, other than incidental use of the item prior to resale. When a retailer or wholesaler's use of items from inventory is more than incidental, then the use becomes a taxable transaction which is separate and distinct from the retailer's subsequent taxable retail sale of the item to the end customer.

Examples

- ***Louisville Manufacturer A*** sends out demos of its product to trade shows. The demos used for marketing purposes are subject to use tax to the manufacturer on the cost of the materials used to manufacture the demo unit. Any subsequent sale of the demo unit (at a standard or reduced purchase price) is a separate transaction and subject to sales tax.

Samples, Demonstrations & Displays

• **Louisville Retailer B** operates a furniture store in the City and has a warehouse and a showroom. The retailer uses furniture, rugs, lighting, wood and fabric samples and other decorative accessories in its showroom. Customers view the floor samples, sit on the furniture and if they like an item may purchase the same item from stock or, may select the desired wood or fabric they want and place a custom order.

The floor stock, rugs, lighting, wood and fabric samples are all subject to City use tax to the retailer. If some of the floor samples are eventually sold, either at the full retail price or a reduced price, the transaction is subject to sale tax.

• **Louisville Manufacturer C** operates a food manufacturing business in the City. The manufacturer will periodically display new product in area grocery stores. The display requires the use of a custom refrigerated case which the manufacturer provides free of charge to the grocery store. If the manufacturer is providing the food to the grocery store free of charge, then the manufacturer must pay use tax to the City on the cost of the food provided. If sales tax was not paid by the food manufacturer on the price of the refrigerated display case, then use tax is due to the City on the purchase price.

Samples, Demonstrations & Displays

- **Louisville Retailer E** operates an electronics store in the City. To induce customers to purchase goods, the retailer uses some of its inventory as demonstrator units on its sales floor. The retailer does not adjust their inventory value on their books as they intend to resell the items. The units are connected to a power source and are available for potential customers to view and test during store hours.

Because Retailer E is using these units for marketing and demonstration purposes, they must pay Louisville use tax on their wholesale purchase price of the units. Should any of the demonstrator units be subsequently sold, the retailer must charge City sales tax on the purchase price paid by the customer.

- **Louisville Retailer F** is a liquor store operating in the City. On the weekends, the retailer offers a “tasting” of wines it carries in the store and provides cheese and crackers to prospective customers. The wine is taken from inventory and the cheese and crackers are purchased from a local grocer. The retailer must pay use tax to the City on the cost of the wine used or discarded during the tasting. If sales tax was not paid by the retailer when purchasing the cheese and crackers, then use tax would be due on those items as well.

Coupons, Gift Certificates, Trade Discounts, Give-Aways

Examples

Retailer A offers a \$10 store coupon on the purchase of all 20" ceramic garden pots. The coupon reduces the taxable purchase price to the customer and sales tax should be calculated on the reduced price.

Manufacturer B publishes clip-out coupons in an area newspaper that offers a 20% discount on all Manufacturer B's vacuum cleaners through the end of the month. Customer A takes the coupon to an area retailer that carries the product and purchases a vacuum using the manufacturer's coupon. Sales tax should be charged to Customer A on the full original price of the vacuum and the 20% discount is subtracted after tax.

Retailer C buys and sells books. Customers can bring in used books and receive a \$1.00 trade-in discount towards future purchases of books. Customer B brings in four books and purchases one book retailing for \$21. Sales tax should be calculated and remitted on the discounted price of \$17.

Coupons, Gift Certificates, Trade Discounts, Give-Aways

Examples (Cont.)

Retailer D is a coffee shop that utilizes loyalty punch cards and annually hosts a customer appreciation day. Customer C buys a latte and receives one punch on their card. Sales tax should be calculated and remitted on the full price of the latte. The same Customer C buys a latte the following week and has a full punch card to present for payment. No sales tax is due on the latte and no use tax is due by the retailer. On customer appreciation day, Customer C comes in for the free 8oz. coffee. Use tax must be paid by Retailer D on all product consumed throughout customer appreciation day.
